

Carson Jones

Cloud Infrastructure | Linux | Kubernetes | Automation | DevSecOps

Huntsville, AL | carsonjones4545@gmail.com | linkedin.com/in/carson-jones-0b4602228

Professional Summary

Systems Administrator with six years of progressive enterprise IT experience spanning hybrid on-premises and Microsoft Azure environments. Focused on Linux, cloud infrastructure, Kubernetes, automation, CI/CD, and secure software delivery in regulated and disconnected operations.

Core Skills

- Linux administration and hardening
- Microsoft Azure and hybrid cloud operations
- AKS and RKE2 Kubernetes platforms
- Docker, Podman, and container runtimes
- Ansible, Terraform, and infrastructure as code
- GitLab CI/CD, GitOps, and release automation
- Python, Bash, and PowerShell scripting
- Root-cause analysis and technical troubleshooting
- Technical leadership and cross-functional collaboration

Experience

Systems Administrator II | Lockheed Martin | June 2025 – Present

- Engineered and maintained enterprise Linux infrastructure supporting development and production workloads across hybrid on-premises and Microsoft Azure environments.
- Designed and administered Kubernetes platforms using Azure Kubernetes Service and RKE2 for containerized application delivery.
- Implemented infrastructure as code with Terraform and Ansible to automate provisioning, configuration, and lifecycle operations.
- Developed and optimized GitLab CI/CD pipelines for infrastructure deployment, artifact management, and release workflows.

Meter Reader | Municipal Utilities Board | June 2024 – June 2025

- Collected and maintained accurate utility meter data for residential, commercial, and industrial customers.
- Inspected meter conditions and communicated maintenance or troubleshooting issues.
- Delivered reliable customer support and detailed recordkeeping for field operations.

Systems Administrator | United States Marine Corps | May 2020 – May 2024

- Supported migration of base-wide on-premises email accounts into a hybrid Microsoft 365 environment.
- Provided Tier II support for DNS, DHCP, Microsoft Exchange, networking, and directory services.
- Managed enterprise automation, monitoring, and reporting initiatives with Microsoft Power BI and configuration-management tooling.
- Supervised technical personnel and contributed to enterprise operations and infrastructure reliability.

Training & Certifications

- CompTIA Security+
- Data Systems Administrator Course
- Data Systems Administrators Supervisors Course
- Corporals Course
- Martial Arts Instructor Course
- Active Top Secret clearance with SCI component

Education

Liberty University | Lynchburg, Virginia | 2021 – Present

Current GPA: 3.7 | Expected graduation: 2026
